

Profile Summary

- **Frontend developer** with **8+ years** of experience working in **product** based company
- Experienced in **Javascript, React, Angular**
- Worked in **AdTech, Financial Crime, Marketing automation, Healthcare** domains

TECH SKILLS AND EXPERTISE

- React, Redux, React hooks, React query, Router, Forms, React testing library, jest
- Angular, Rxjs, Typescript, Microfrontend, Jasmine/Karma, cypress
- Javascript, DOM api, D3.js, echarts, rappidjs, HTTP and Rest compliance
- Node.js, Golang, java. Basic Data structures and algorithm.
- Version control using git, svn.

EXPERIENCE

03/24 - Present

Lemma Technologies

Senior Software Engineer

- Led product development for new features on the **SSP platform**, delivering small-scale releases for **railways** and **IPL publishers** using **React**.
- Spearheaded the creation of **reusable component libraries (theme, pattern, core, chart)** to streamline development and ensure consistency across projects.
- Create a couple of **Rest Apis** using **golang**
- Developed a **unified authentication library** to standardize workflows and reduce redundancy across multiple products also took part in **JWT based authentication** framework in golang
- Contributed to the development of the **Lemma SSP platform** and **header-bidding solution**, enhancing overall platform performance.
- Actively participated in **improving Jenkins pipeline, deployment processes**, and overall development workflows.

12/2020 - 03/2024

Iris Software

Senior Engineer - Technology

- Led development for a **financial risk management** project, driving **system design and architecture** with **Angular**.
- Implemented **Print to PDF** functionality using the **jsPDF library**, while gaining expertise in **print CSS** and related technologies to enhance **report generation**.
- Also worked on the rest api based on node.js
- Conducted knowledge transfer (KT) sessions to educate teams on tools and technologies used in development and deployment.
- Technologies/Tools: Angular 14, JavaScript, nodejs, npm, Git, Jenkins, Docker, REST APIs, Jasmine, Karma, SonarQube, AG-Grid, Jira, Kubernetes.

04/2019 - 12/2020

HCL Software

Developer

- Led frontend development for a **marketing automation product**, managing the complete design and user flow using **Angular**.
- Developed **an adapter layer** to facilitate seamless communication between the Angular-based product and **Rappid.js** (Backbone), ensuring smooth integration.
- Built **reusable libraries** to maintain consistent UX standards, design patterns, and behavior across the application.
- Technologies/Tools: Angular 8, JavaScript, npm, Git, Jenkins, REST APIs, Jasmine, Karma, SonarQube, AG-Grid, Jira.

07/2016 - 03/2019

Infosys Ltd

Senior Systems Engineer

- Developed a web application for **healthcare providers**, allowing users to enroll and manage various plans using Angular.
- Migrated the website from **MPA (JSP) to SPA (Angular)**, significantly enhancing user experience and performance.
- Implemented progressive loading in a .NET-based application, **optimizing initial load times** and improving overall efficiency.
- Contributed to **accessibility improvements** for a **native Android** application, ensuring a more inclusive user experience.
- Technologies/Tools: Angular 5, JavaScript, npm, Git, Jenkins, REST APIs, Jasmine, Karma.

EDUCATION

2012 - 2016

Dharmsinh Desai University

B.Tech(Computer Engineering)

Completed all the semester with distinction. Also built 4 small scale projects as part of curriculum.
